

## *Transparent Statement of Earnings & Reimbursements*

Providers receive crystal-clear feedback on what they did to earn their pay every pay period. The performance-pay link is well understood and empowers each provider to work the plan.

## *Compensation Plan Modeling*

Combine historical metrics with new compensation methods for one or more providers to forecast the impact of a financial change for both your providers and your budget. Create and save unlimited scenarios to regenerate at a click of your mouse.

## *Training Wheels*

Introduce a new compensation plan side-by-side with the current plan right on the Statement of Earnings & Reimbursements to show providers what to expect "when the training wheels come off." Take all the time you need to gain consensus and set realistic expectations for the change.

## *Performance Reports*

Analyze the unique combination of clinical performance and earnings data, sliced-and-diced exactly the way you like it. The marriage of time worked, services rendered and provider payments gives invaluable insight into process improvement that will impact your bottom line.

## *Go Paperless*

Deliver PDF documents automatically to providers using the COREmatica® Distribution Center. The documents can be emailed as an attachment, emailed with a link and/or downloaded from the web portal. No paper and postage necessary!

## *Rules-Based Calculation Engine*

100% accurate. Reliable. Scalable. COREmatica® is proven software that gives you control over all the ways that clinicians are paid.

*If you can say it, we can pay it!*

## **Physician Pay: This Changes Everything!**

COREmatica®, our performance-based compensation management system, lets you regain control of your payroll. We align your provider income goals with your corporate strategy in a way never before possible! Our software reduces payday errors to zero, increases revenue by paying on what matters to you and dramatically improves payroll efficiency.

## **Reduce Errors**

Stop overpaying your docs! Industry statistics show the average company overpays its providers by 2-10%! Our powerful calculation engine consistently and accurately calculates payments based on objective metrics and the rules you set up for each clinician, for each business unit, site, shift, and day of the week.

## **Increase Revenue**

Put the power to increase revenue in the hands of your providers and you will see results from better, timelier documentation and accelerated throughput. Capture more dollars, stop leaving money on the table and create a win-win for patients, providers and your profit margin.

## **Improve Efficiencies**

Produce payroll faster and better by automating production of service-to-gross pay. Reduce or eliminate manual processes and reliance on spreadsheets. Automate the interfaces to all the systems in your IT architecture. Import data from EMR, billing, scheduling – you name it. Export GL account-based earnings data to human resource, payroll service and accounting systems. All is now possible with the power of COREmatica®!

## **Support Simple and Complex Incentive Payments**

With COREmatica®, you can consistently and accurately calculate performance payments based on RVUs, charges, patients, shifts, patient satisfaction, meetings and more. COREmatica® supports over 150 payment methodologies so go ahead – release your corporate imagination!

## **Provide Audit Trail**

COREmatica® gives you volumes of historical data and an audit trail that provides documentation for how each clinician was paid, at any point in time. The collected data lets you explore trends and statistical significance to make better strategic decisions and grow your business!
